Andean States and the Resource Curse

Institutional Change in Extractive Economies

Edited by **Gerardo Damonte** and **Bettina Schorr**

Series: Routledge Studies of the Extractive Industries and Sustainable Development

The latest global commodity boom has profoundly marked the face of the resource-rich Andean region, significantly contributing to economic growth and notable reductions of poverty and income inequality. The boom also constituted a period of important institutional change with these new institutions sharing the potential of preventing or mitigating the maladies extractive economies tend to suffer from, generally denominated as the "resource curse". This volume explores these institutional changes in the Andean region to identify the factors that have shaped their emergence and to assess their performance.
